

JCPB FiberTie:

Your connection to Johnson City Power Board's Fiber Optic Network

Take Total Control of Your Network Connections:

JCPB's FiberTie offers the flexibility, security, scalability, and reliability that you need to maximize the potential of your networks. FiberTie gives you complete control over the equipment you need to power your network across dark fibers available within JCPB's fiber optic backbone - *You maintain total control of your protocol, platform, and bandwidth while JCPB maintains your dedicated fibers!*

● ACCESS

Your network is exactly that; *YOURS!* When you connect to FiberTie, you will have complete control of your dedicated fibers.

● BANDWIDTH

The sky is the limit. JCPB will not meter or monitor your bandwidth and the only limiting factor will be your own equipment.

● EFFICIENCY

Use FiberTie to bring all your services to a centralized location where you will be free to distribute them however you see fit.

● FLEXIBILITY

Get exactly the service you need when you need it. You can add, replace, or upgrade your equipment at your own pace - It's the only way to grow!

● SECURITY

Don't want exposure to threats on public networks? With FiberTie you can stay clear of threats and keep your network 100% private and secure.

● RELIABILITY

Since no one shares your FiberTie connection, your service is as reliable as your own equipment. Also, fiber's high tensile strength makes breaks less likely from storm damage and traffic accidents.

● SUPPORT

Outages on JCPB's fiber optic network are rare, but just in case, we have a 24 x 7 x 365 dispatch center ready to quickly restore your connection.

● BUSINESS & INDUSTRY

All types of businesses and industries benefit from secure fiber connections - just ask us how.

SERVICE AREA:

In Northeast TN, JCPB's electric distribution system covers nearly 350 square miles (primarily Washington Co). We have a robust 163 mile fiber optic network with 144 and 299 count fiber connecting our electric substations. The fiber routes place us in close proximity to a large portion of the business properties within our service territory. The Wash Co, TN area includes Johnson City, Jonesborough, and Gray. Portions of Sullivan Co, TN are served, including Colonial Heights (Kingsport area), TN and Piney Flats, TN. A large section of I-26 passes through our service territory and a small portion of I-81. Please contact us to find out more detailed information on your location.

PRICING OPTIONS:

Standard pricing is available. For those requiring large amounts of fiber or a customized lease agreement, JCPB will consider needs on a case by case basis. Additional considerations may include building a fiber drop to premises and/or extension of fiber optics into other areas of our territory.
